

Kudos Retail

Retail runs the tills, manages your stock and delivers a powerful integrated system for your business

More than an EPOS solution, Kudos Retail is feature rich to help you sell more at the tills and streamline your business process.

Fully integrated with Kudos Workshop, Unit Trader, Mail Order and Webshop, multichannel retailers can be sure that they are running their business on one central system.

Complete Stock Management

Every item in your shop is stored and managed on one central system. So, at any time you can see what you have in stock and the items that you need to re-order.

Quick Look Ups

Scan the goods or look for the item using the fast search facility. Give discounts, charge to account or take split payments.

Programmable Touch Screens

Design the layout that's right for your business. Add product pictures and set up categories that are easy to use. It all means quicker throughput, fewer errors and less queuing.

Smarter Marketing and Promotions

Run promotions, give discounts and accept vouchers. Set up and run loyalty schemes. With an inbuilt customer database, you can record sales against customers, building valuable information on specific buying trends.

Presenting More Information to the Customer

Integrated datasheets mean that any till operator can access and print more information at a customer's request. Great for complex stock items.

Helping You Sell More

At the till, Kudos prompts the operator with related products to suggest to the customer. These related products are based on hard sales data and not guesswork.

Retail at a Glance
