Time Sheet and Log On Entry

- Record work done by engineer's timesheets, or have the computer calculate time on job by logging on and off the job.
- Record time at work to allow comprehensive reporting of labour utilisation efficiency.
- Maximum control, minimum admin hassle

Break Jobs / Appointments into Linked Tasks

Subdivide jobs into separate tasks which can then be invoiced separately. Allows separate scheduling, skills application and invoicing to different customers for warranty or insurance elements of a project.

Project Invoicing

Group linked jobs on summary invoice or invoices

More Ways to See the Work

Task based screens to manage jobs by type, fitter allocated, due dates and user defined parameters

Schedule Jobs in Outlook

Use your Outlook diary to schedule resources and diary jobs in the workshop. Changes made in Outlook can write back to the Kudos timings.

Length Based Charging

Automatically charges parts such as storage or service parts such as washing or painting based on the length (or area or what you will) of the unit.
